WORDSEARCHES

This section is full of wordsearches. Beneath each puzzle is a list of words that are hidden in the grid above it. You'll find the words running in a straight line in any direction, including diagonally, and either forwards or backwards.

Occasionally, some of the puzzles contain a phrase or word written beneath the grid that includes punctuation – in these cases just ignore the spaces or punctuation marks when looking in the grid. When you find a word, mark it in the grid and cross it off the list below. Some of the puzzles have interesting shapes with lines drawn between the letters in the grid – ignore these when solving the puzzles, since the words can still run across these lines.

You should also remember that some of the words in each puzzle will overlap one another – using the same letters in the grid.

The wordsearches get harder as you work through the section. If you get completely stuck and can't find a word, don't panic – all of the answers are in the back of the book.
