FLY THE FRIENDLY SKIES

It's sleek, energy efficient, and the longest commercial aircraft in the United States. The whole fleet of Boeing 747 planes have flown more than 5 billion people. What else makes these awesome airplanes stand out?

14
stair steps to the upper deck

Fuel tank holds:
63,034 U.S. GALLONS (238,604 L)
That amount of fuel would fill the tank of over 5,000 small cars!

2.5 MINUTES
length of time it takes the jet to travel the length of a marathon (26.2 miles/42.2 km)

Length:
250 FEET, 2 INCHES (76 m)
That's as long as a 25-story building is tall.

Range:
7,790 NAUTICAL MILES (14,430 km)
This plane could fly from Miami, Florida, U.S.A., to London, United Kingdom, and back, before landing.

1 wing can fit in the same floor space as 4 houses, each with 3 bedrooms and 2 baths.
