HIDDEN WORLD
Forest

Plants

Growing from the forest floor are all kinds of plants, trees and shrubs.

Tree

Flower

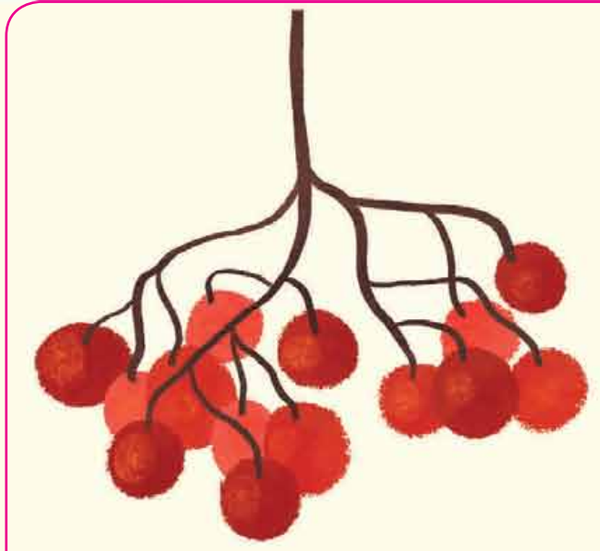

Mushroom

Leaf

Acorns

Berries

All trees have roots, a trunk and branches.
Some also have fruit and flowers.

Wild mushrooms are part of the fungi family and come in all shapes and sizes.

The big, tall Oak tree grows
from a single acorn.

The colourful parts of a flower are called petals.

Leaves grow from buds. They grow, change colour and then drop with the seasons.

Berries are a popular food
for birds, especially during
the colder months.
