William Bee's Wonderful World of Tractors and Farm Machines

Hello. I am William Bee, and this is my Wonderful World of Tractors and Farm Machines.

Tractors and farm machines help farmers grow most of the food we eat. Potatoes and sugar and wheat and peas and carrots and apples and strawberries and... well you get the idea.

If it wasn't for farmers there wouldn't be any bread, or pasta, or chips, or sweets, or cakes, or cereals, or jam or... anything much to eat at all!

Tractors are the most useful of farm machines.

They can be very small and thin – like this one.
It can get between apple, pear and plum trees
without knocking the fruit off all the branches.
