How?

How is plastic made?

How long does a plastic bag last?

How many things in your room are made from plastic?

How does plastic harm animals?

How is plastic recycled?

Only some types of plastic ARE recycled.

How many plastic bottles are bought each minute?

How can we clear up plastic?

How much plastic is made each year?

How does plastic help us?

How does plastic get into the ocean?

Why?

Why does plastic take so long to go away?

Why are countries banning plastic bags?

Why do we package things in plastic?

Why aren't all plastic things recycled?

Why was plastic invented?

Why is there so much plastic in the world?

It's shocking!

The world makes TWICE as much plastic today as it did 20 years ago.

Why can't we just burn it?

Don't even think about it!

Why don't we make packaging out of...

...wood?

...glass?

...metal?

...mushrooms?

Surely not!

add a little bug saying this

Do you know what these triangles mean?

Each number represents a different kind of plastic...

1

2

3

4

5

6

7

The triangles are stamped onto the plastic.

Check which numbers are recycled in your local area.

Yes or no?

Can plastic be recycled again and again?

Can we live without plastic?

Does everything need packaging?

Can we invent a better plastic?

Are thin plastic bags better than thick ones?

Is there any plastic pollution here?

Are some plastics worse than others?
