If you eat breakfast cereal you need this book!

40 pages bursting with over 20 amazing ideas, terrible jokes and 30 of our genius Magic Corners.

RELEASED OCTOBER 20th

We're a family business...

Our family really, really love making things. We invented JUNKO to help kids (and grown-ups!) upcycle their home's recycling into toys. Hopefully, you'll agree that there's no need to buy new toys all the time - it's way more satisfying and good for our brains to learn to make things ourselves and of course it's much more eco-friendly too :)

Just like you, we care about the planet, so JUNKO is made from recycled plastic - that way we use less of the earth's precious natural resources. If we don't use up old plastic (there's more of it than you can imagine) it gets buried, burned or finds its way into the sea - each has an environmental cost.

Magic Corners are sturdy, reusable, they cut out the single-use plastics you get with sticky tape or glue - and they join up card better than anything else we've seen! When you're done playing, just take your creation apart and pop it in recycling (so long as you haven't covered it in paint!)

We hope you enjoy this book of ideas. We'd love to see what you make too! Please ask an adult to share your wonderful creations on our social media or email: imadethis@planetjunko.com - we might just include your idea in our next book!

BOO!

hello

from everyone at JUNKO

this book belongs to

JUNKO
MAKE JUNK INTO TOYS!

IDEAS BOOK

includes 30 Magic Corners

NO MORE MESSY STICKY TAPE
REUSABLE, EASY & ST

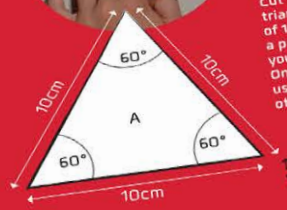

MADE FROM RECYCLED PLA

don't hang about!

happy vampire bat

1 Cut out 7 equilateral triangles with a side length of 10cm. It's easiest to use a protractor to measure your 60° angles. Once you have one triangle use it as a template for the others.

THERE'S A TRIANGLE TEMPLATE ON PAGE 40 OF THIS BOOK!

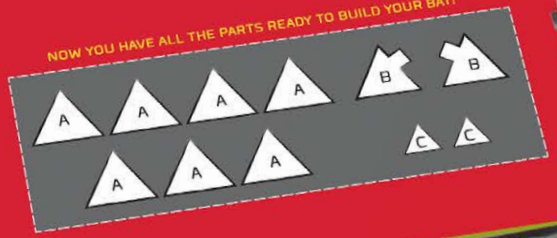

2 Then make 2 more triangles the same size but with 2 tabs. These tabs will join the head onto the body. Make them quite chunky!

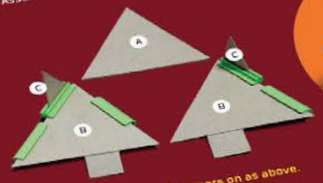

3 Cut out 2 little triangles for the ears, you can do long ones or short whatever you fancy!

NOW YOU HAVE ALL THE PARTS READY TO BUILD YOUR BAT!

4 Assembling the head

Put the Magic Corners on as above.

Slot the 2 pieces with the ears together – then attach the final piece

5 Now let's make the slots to help hold the head on the TOP of the body Using an 'A' triangle, mark where the tabs go – just like we're doing here. Then cut 2 slots. ASK A GROWN UP TO HELP WITH THESE – we used pointy nail scissors.

6 Now we can assemble the body and wings

Fix on the Magic Corners

JOIN BLUE EDGE TO BLUE EDGE & YELLOW TO YELLOW

Then slot the body together

7 Slot the head onto the body and your bat is all done!

IDEAS BOOK includes 30 Magic Corners

NO MORE MESSY STICKY TAPE OR GL
REUSABLE. EASY & STRONG

MADE FROM RECYCLE PLASTI

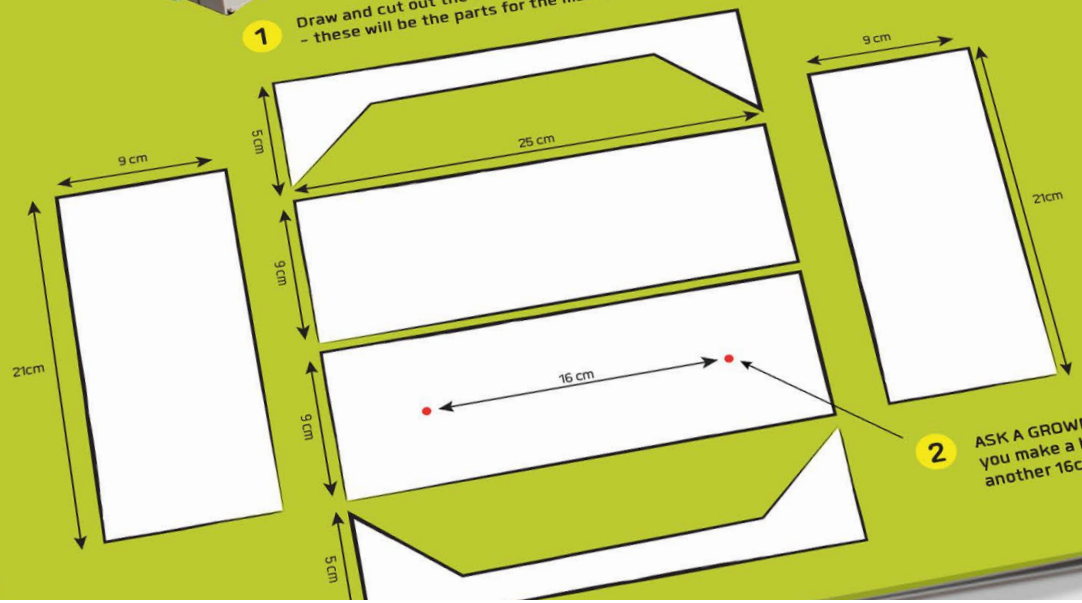

relax in the sun

doll swing seat

NOTE: YOU NEED 2 PIECES OF STRING TO MAKE THIS!

1 Draw and cut out the card like we have below – these will be the parts for the main frame

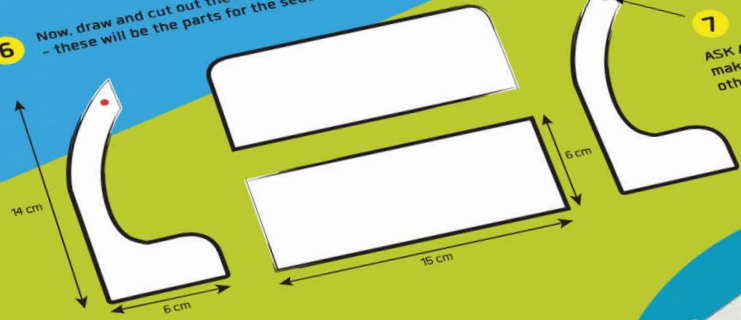

2 ASK A GROWN UP to help you make a hole here and another 16cm to the left

5 Slot the inner frames into the outer frame

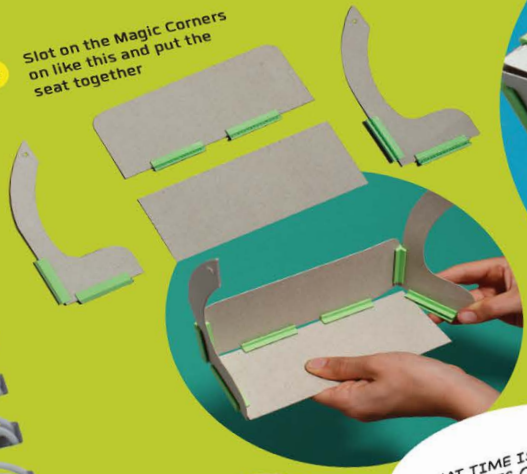

6 Now, draw and cut out the bits of card as below – these will be the parts for the seat

7 ASK A GROWN UP to make a hole here and another one here

8 Slot on the Magic Corners on like this and put the seat together

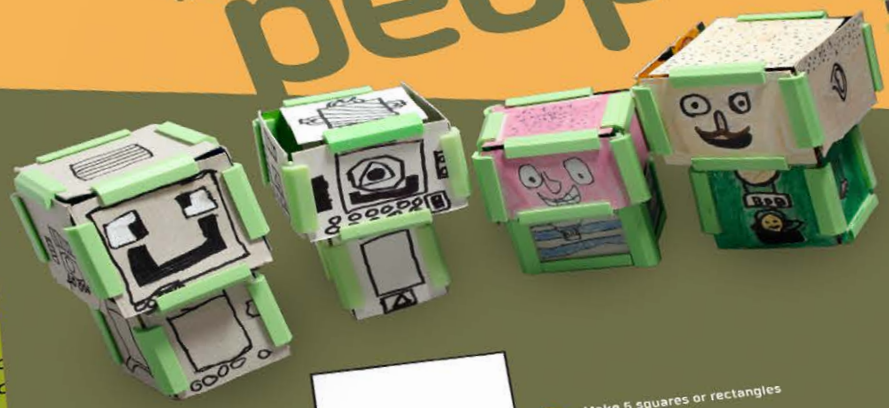

cheeky things

little robots people

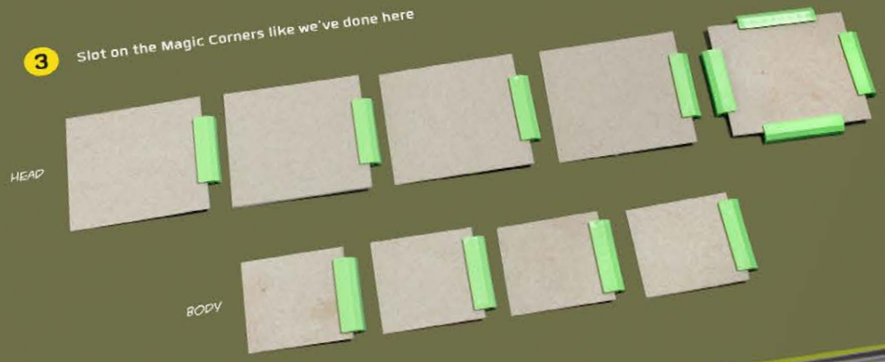

MAKE SURE THE BODY RECTANGLE IS NARROWER THAN THE HEAD

1 Make 5 squares or rectangles for the head.

2 Make 4 rectangles for the body which are at at least 2cm narrower than the head

3 Slot on the Magic Corners like we've done here

4 Put the head together

5 Then put the body together

6 Now we need to make 2 little card link pieces like these. These pieces are to join the head onto the body. You may need to try a couple of different sizes to see what works. We like to start off too big then trim them smaller if needed.

7 Now you can slot the head onto the body and say hello to your new little friend!

WHAT DO ROBOTS DRINK FROM?
a robottle

...and aliens!

IDEAS BOOK

includes 30 Magi Corn

NO MORE MESSY STICK RELISABLE EAS

contents

We know you love a challenge! So, the ideas get a bit more tricky as you go through the book! Don't worry, you will be amazed at how good you get at making!

EASIER...
