Note to Grown-ups

Learning lots of new words is a wonderful aid for young children's language development. A wide vocabulary also helps children to explore and understand the world around them as they grow and learn. Reading the words while looking at the pictures together creates a valuable learning experience.

This book includes new words as well as familiar ones. Even grown-ups might not know some of the words, and there is a pronunciation guide at the end of the book to help.

In this book you will find **50 words** about **animals**, which are living things just like you. There are lots and lots of different kinds. Keep reading to find out about some of the most **interesting** animals on **Earth**.

Birds are animals that have:

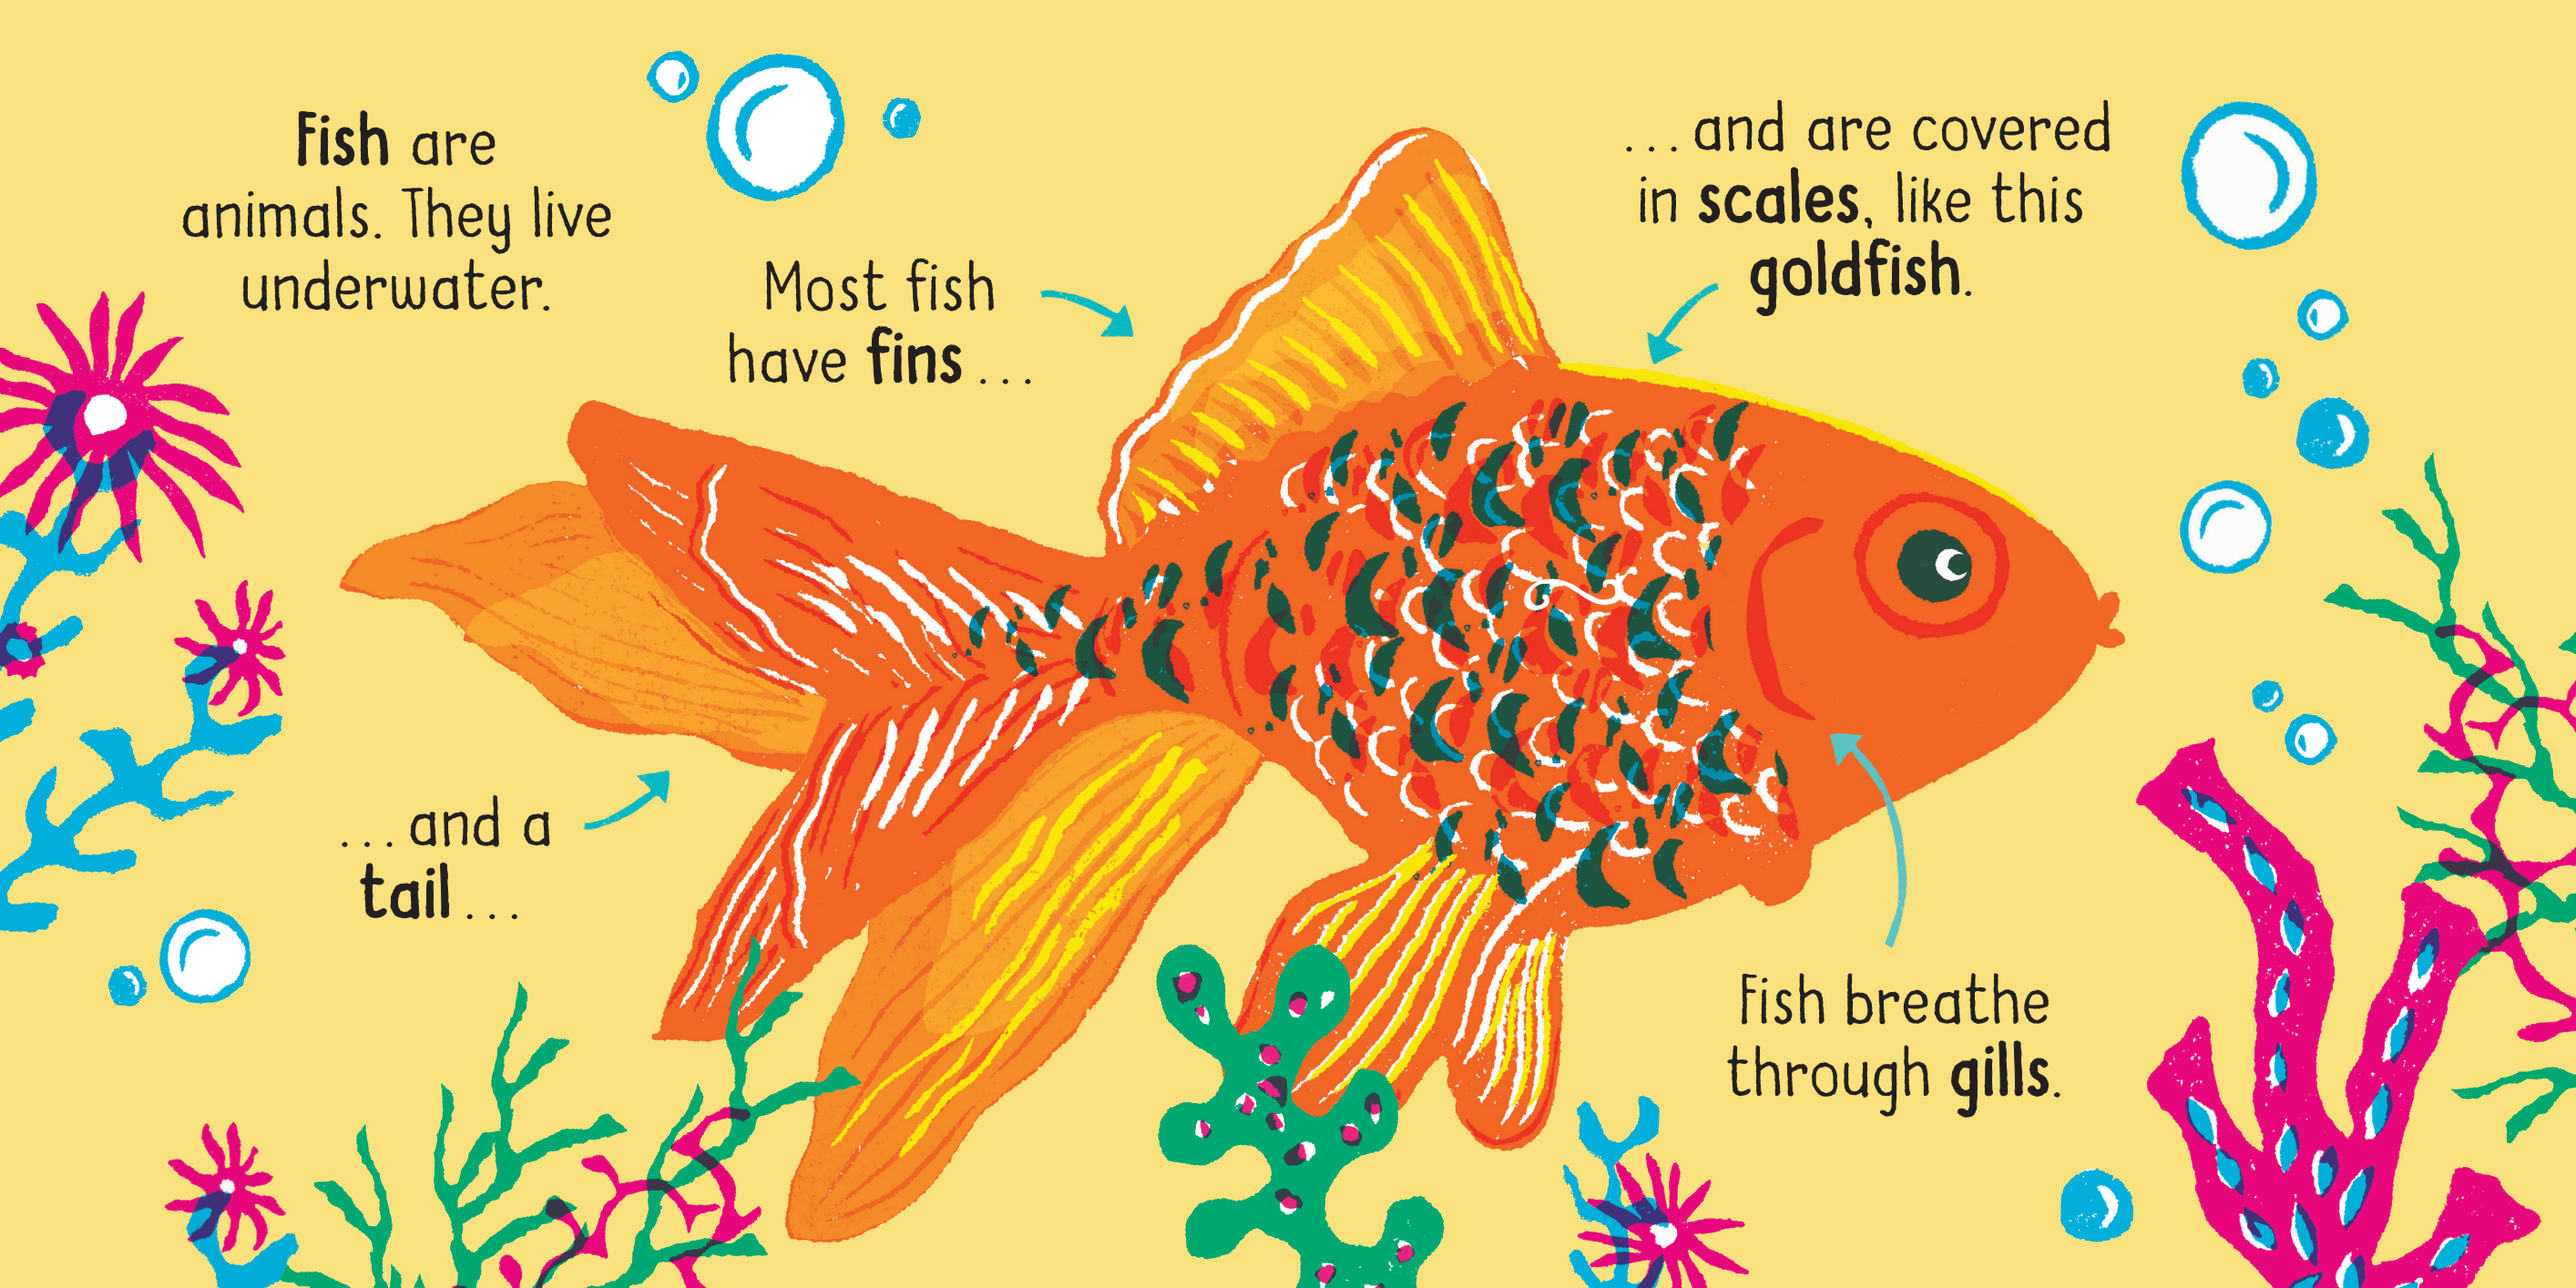

two **wings**

a **beak**

two legs

All birds are covered in **feathers**. This one is a **hummingbird**.

Baby birds, like this chick, hatch from **eggs** laid by their mother.

Fish are animals. They live underwater.
Most fish have **fins** . . .
. . . and are covered in **scales**, like this **goldfish**.
. . . and a **tail** . . .
Fish breathe through **gills**.
