PATTERNS IN NATURE

GREYSTONE KIDS

GREYSTONE BOOKS • VANCOUVER/BERKELEY/LONDON

Branching

Branching patterns repeat the same or similar shapes over and over again in different sizes. Lightning branches as it fills the sky, while tiny ice crystals branch into delicate snowflakes as they grow.

Meanders

Meanders are repeated curves that can flow smoothly for a long time. Meandering calms a river's flow and describes the way a corn snake moves as it travels over the ground.
