ROBOT 23: MYSTERY MENACE RETURNS

News // UK // Analysis
by D C Howarth, Special Correspondent

Sources within R.A.I.D. and the Metropolitan Police have confirmed that the mysterious cyber-terrorist known only as ROBOT 23 is still operational and active, despite earlier reports of its destruction. Furthermore, these same sources suggest that the hostile mechanoid is indeed responsible for the REVOLUTION 23 Malware, a piece of hostile software thought to be the cause of a recent wave of robot malfunctions and incidents culminating in the recent robot attack on Buckingham Palace.

Very little is known about the origins of Robot 23 - where it came from, or indeed who constructed it and why. Online rumours suggest that it is the last and deadliest creation of the notorious cyberneticist Dr Leon Robertus, popularly known by the nickname 'Dr Roboticus', who was responsible for the design of much of the software and engineering architecture upon which the modern field of robotics is built, and who was directly responsible for the construction of popular robot 'heroes' the SUPER ROBO 6 and, latterly, the sentient robots Alex and Freddy Sharma, better known as the MEGA ROBO BROS.
