

The Egg

with transparent pages

My First Discovery
Paperbacks

Look! The eggshells crack open when the chicks peck at them from the inside.

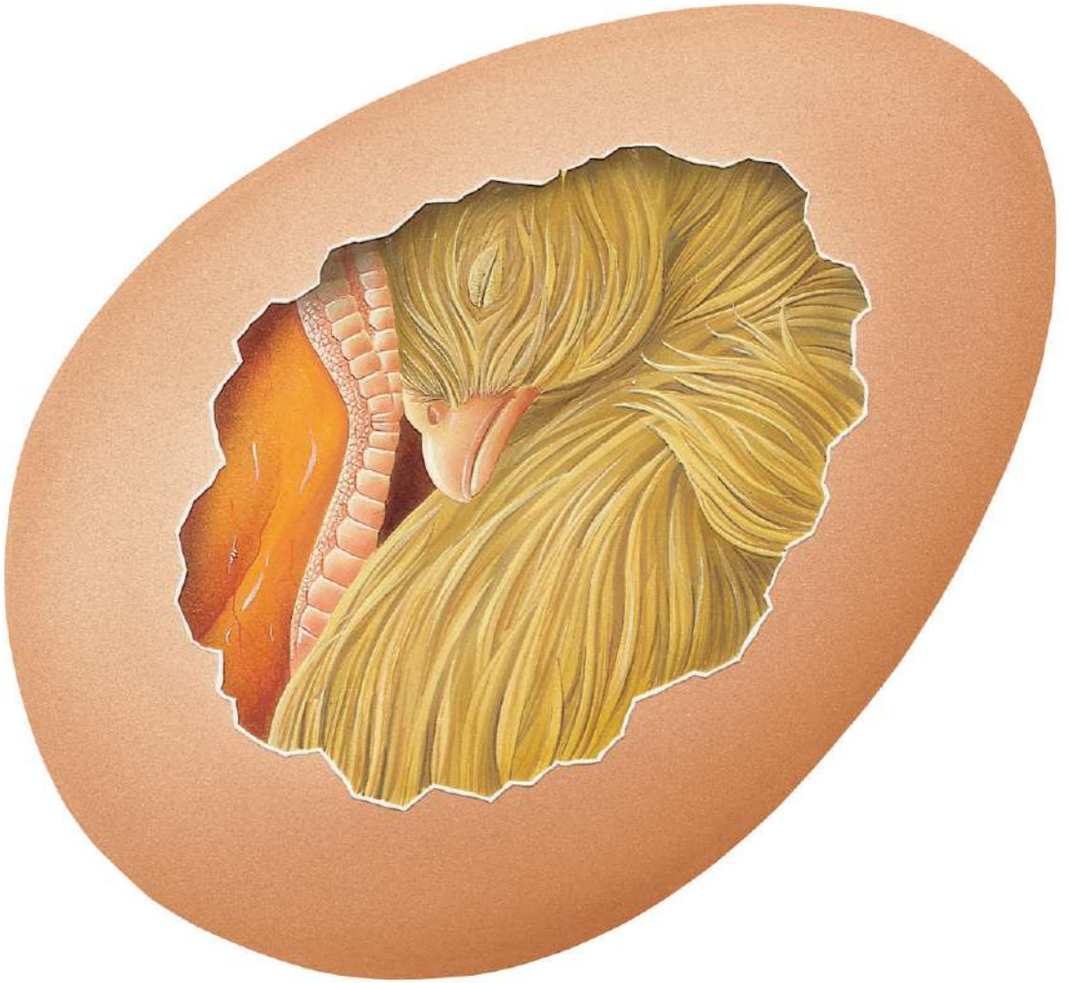

The chick has hatched!

It will walk very soon.

The hen sits on the eggs
for 21 days until they hatch.

After only two days, there is a
tiny chick inside the egg.

The chick grows quickly.
Soon it will be ready to hatch.

Dragonfly

Ladybird's eggs

Louse

Spider

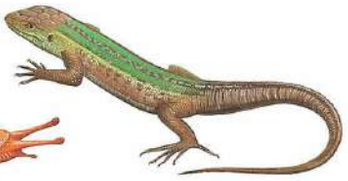

Mosquito

Butterfly

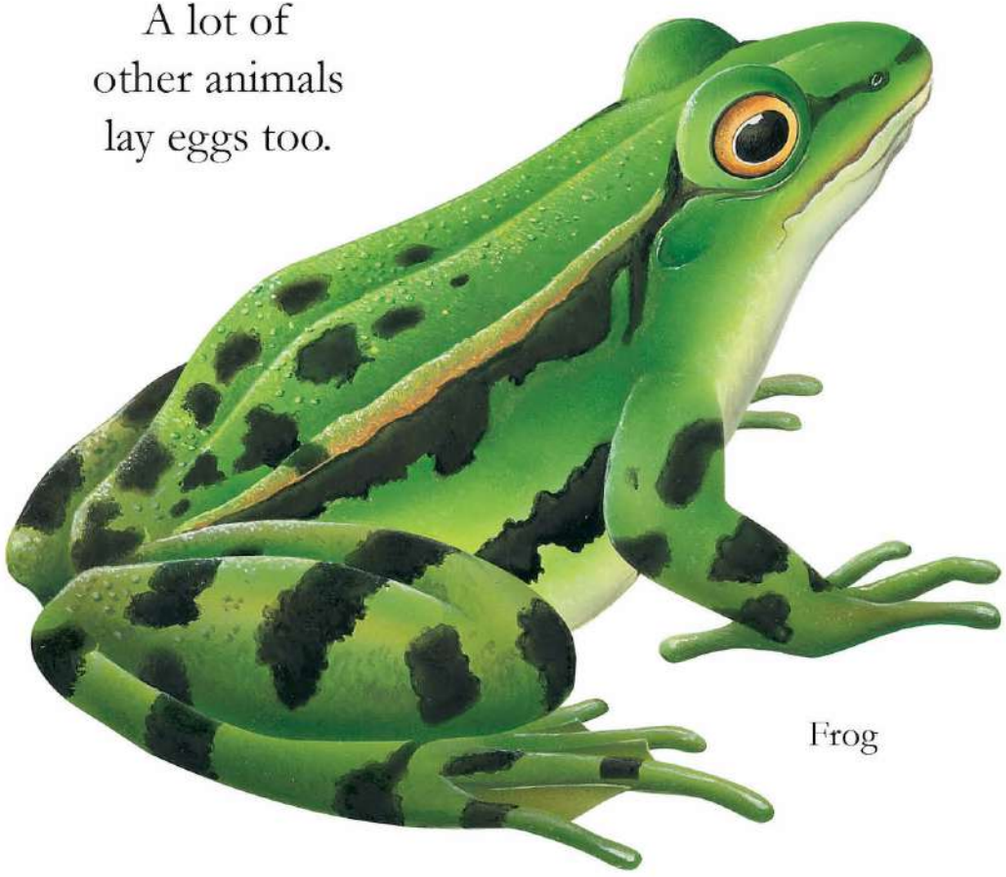

Slug

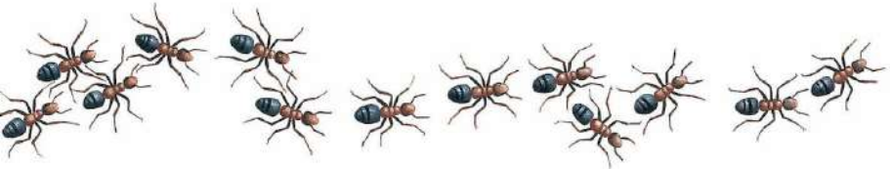

Lizard

A lot of
other animals
lay eggs too.

Frog

Ants

Snails lay their eggs in holes.
