

Flowers

My First Discovery
Paperbacks

with transparent pages

The orange
but inside is
the pistil.

The stamens are
clothed with
yellow pollen.

central pistil
of blue base
to be yellow.

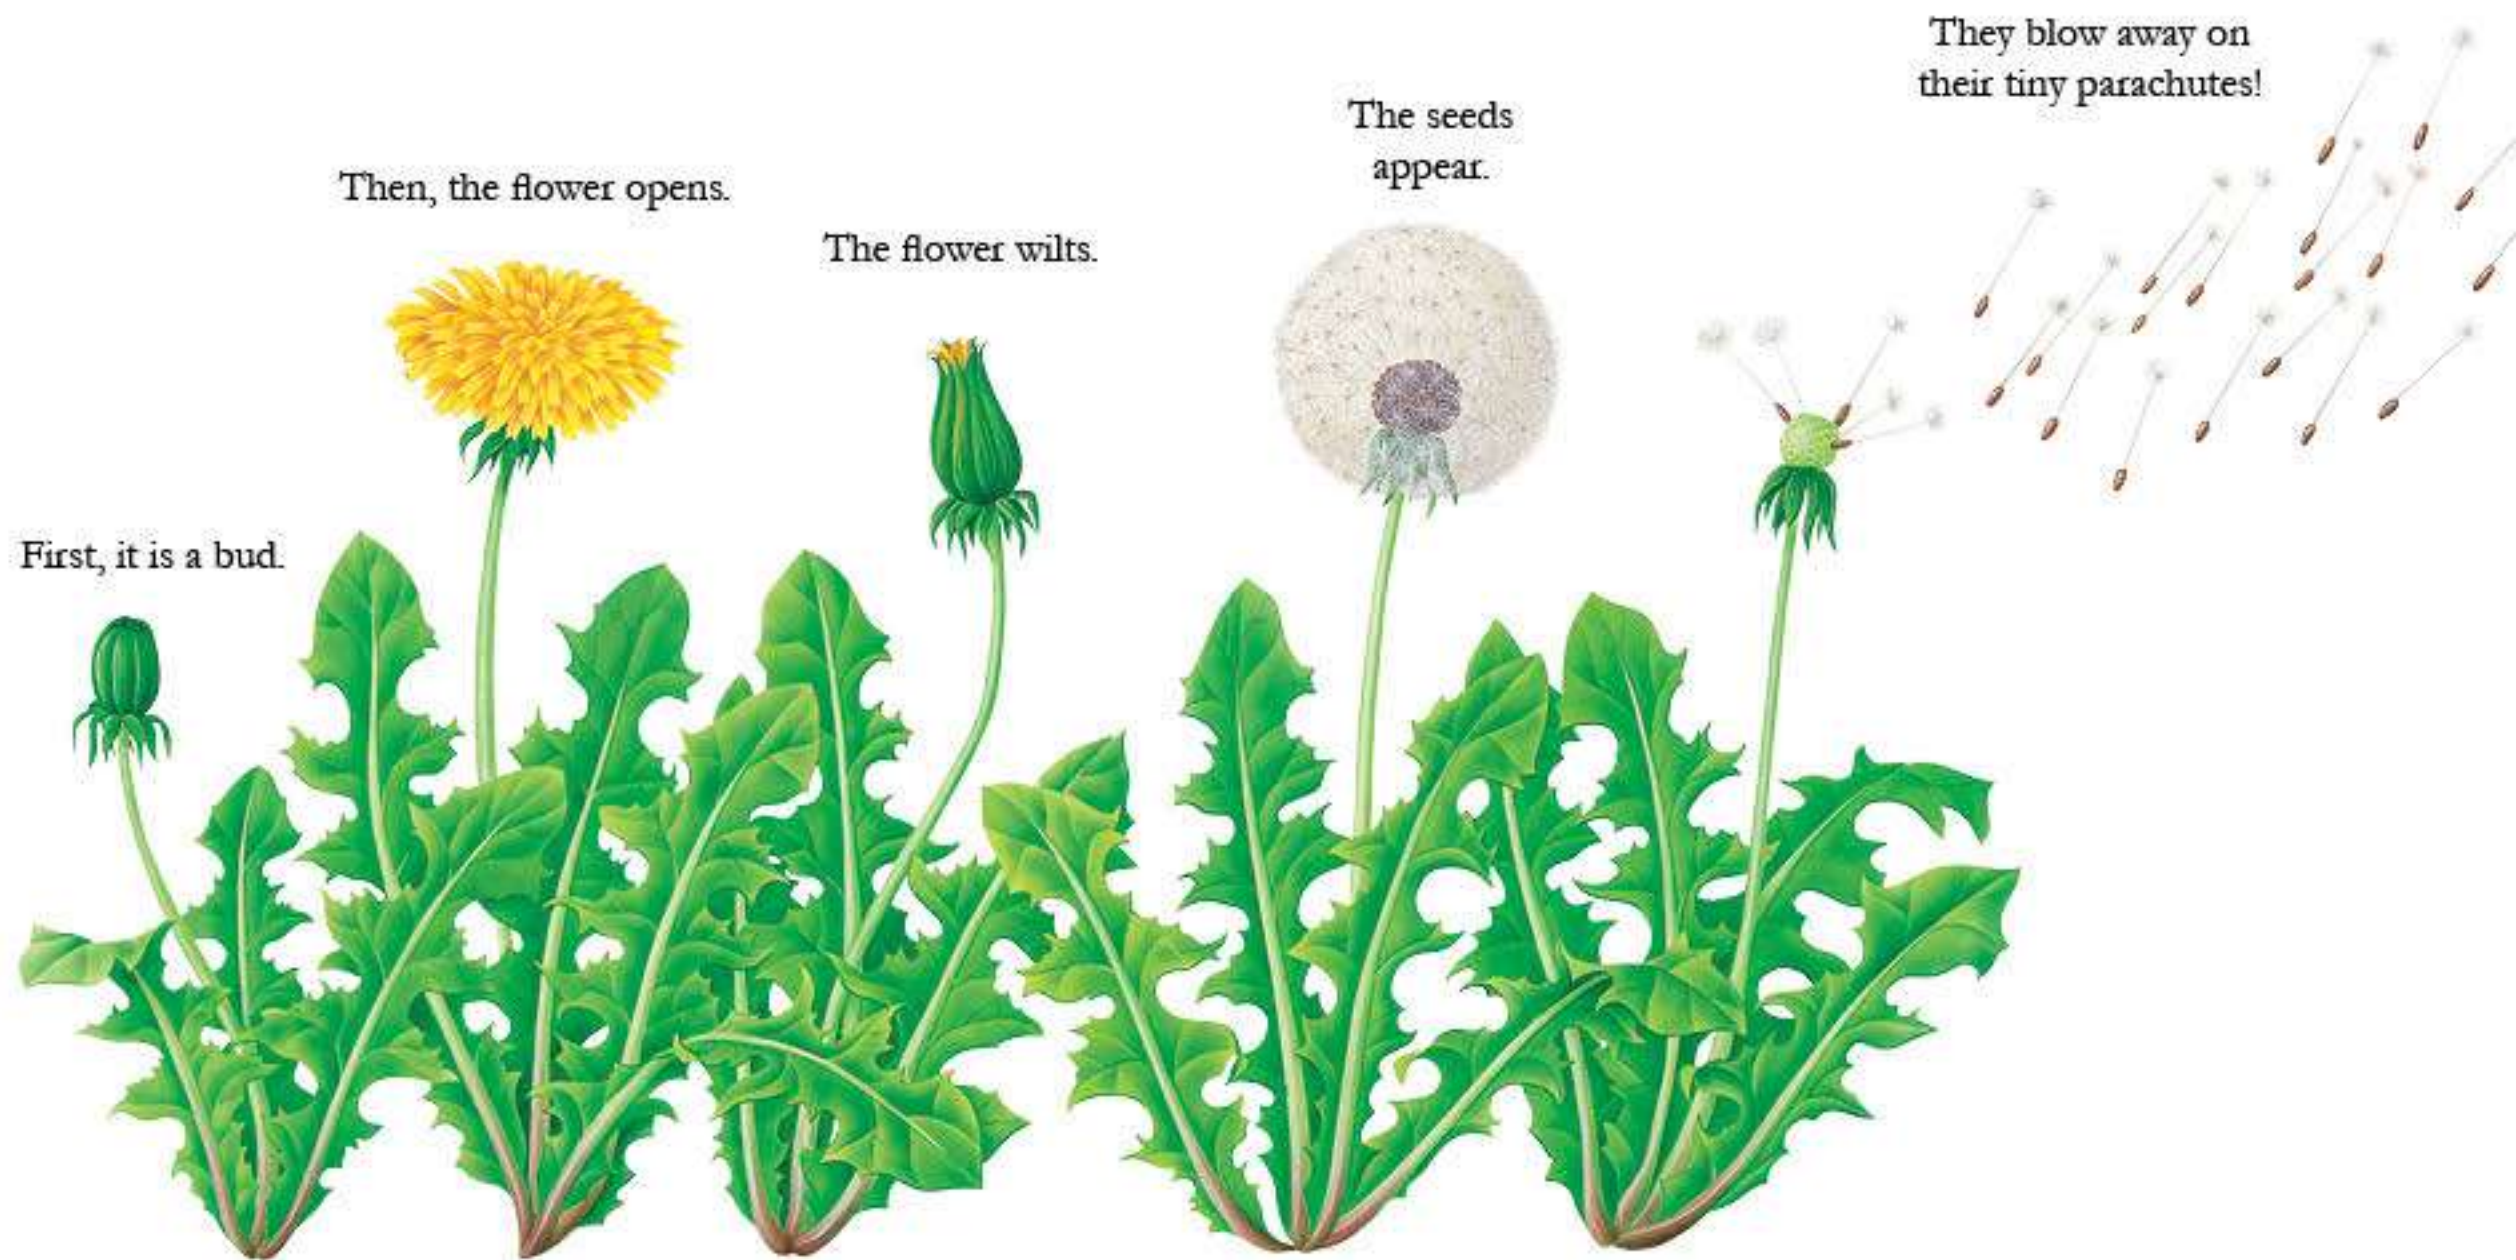

Crocuses
are the pistils
which are yellow.

Insects are attracted by the scent and colour of the flowers. They land on them and drink the nectar.

Pollen from the stamens sticks to their legs. They carry it to the pistils of other flowers.

This is a dandelion, from flower bud to seed.

Sage

Foxglove

Sweet violet

Clover

Orchid

Daffodil

Harebell

Iris

You can recognise
flowers by their different
shapes, colours and scents.

Insects are attracted by the scent and colour of the flowers. They land on them and drink the nectar.

Pollen from the stamens sticks to their legs. They carry it to the pistils of other flowers.
