

Fruit

My First Discovery Paperbacks

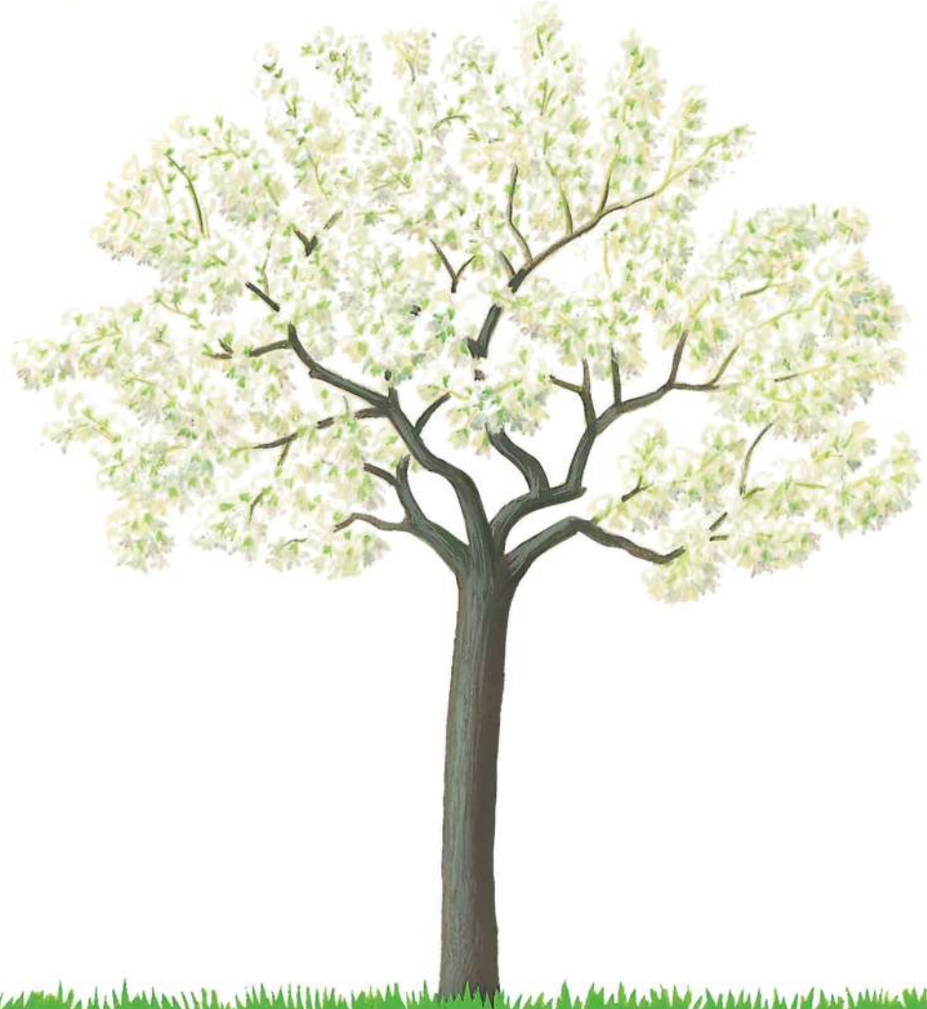

with transparent pages

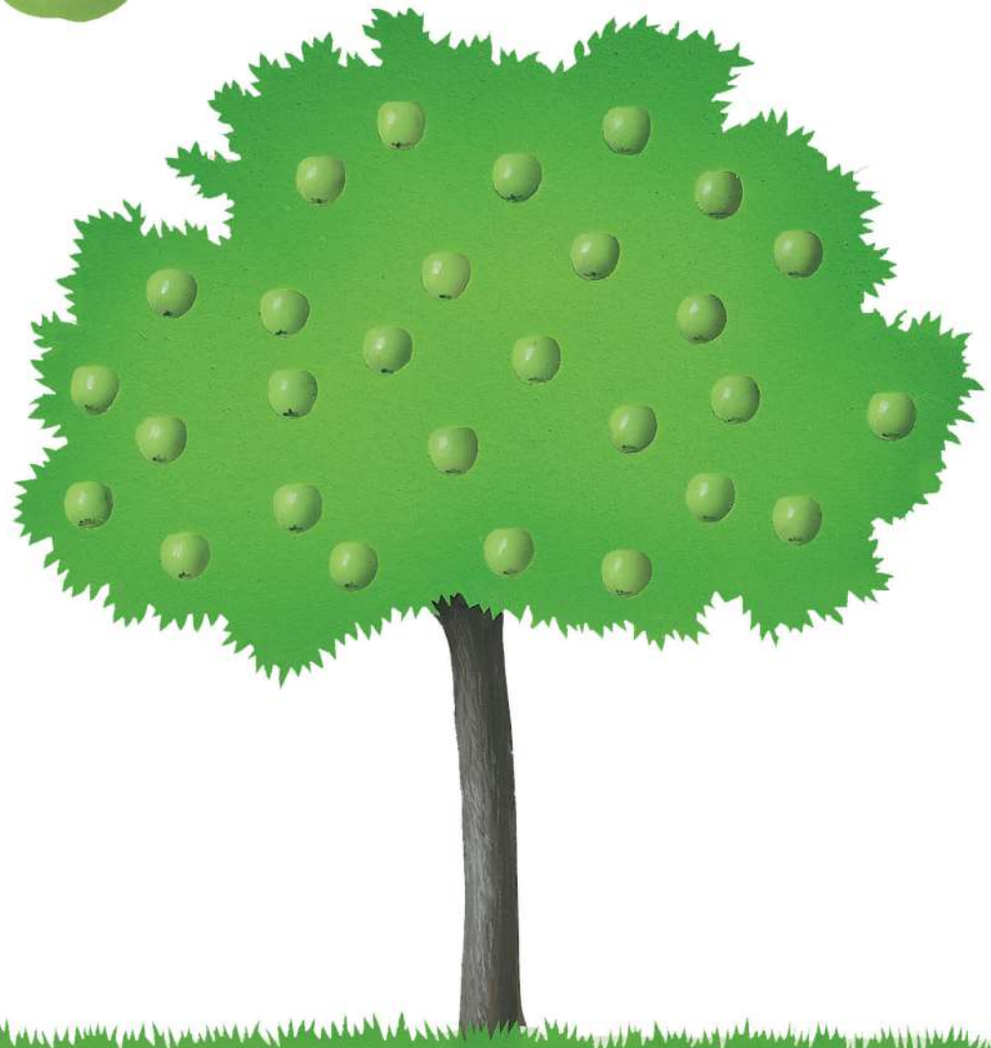

The apple tree is covered in blossom in spring.
In summer, the blossom turns into fruit.
In autumn, the apples are ready to pick.
In winter, the apple tree loses all its leaves.

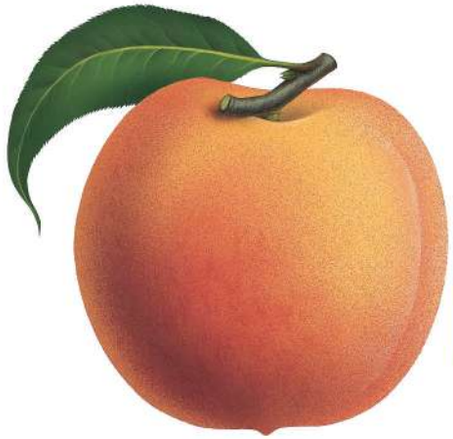

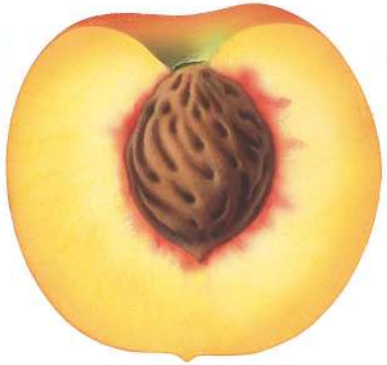

The apple tree is covered in blossom in spring.
In summer, the blossom turns into fruit.

Some fruits have a hard stone, which protects the seed.

Peach

The seed is inside the stone.

Plum

Apricot

Cherry

An apple has pips. Pips are the seeds of the apple tree.

The seed begins to grow in the soil. The root grows downwards.

A stalk and leaves appear. The apple tree grows up.
