

Trees

My First Discovery Paperbacks

with transparent pages

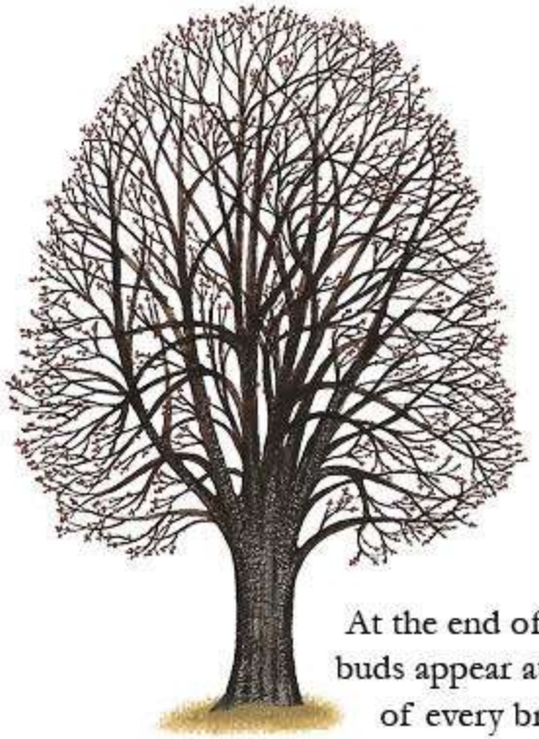

At the end of winter,
buds sit at the end
of every branch.

The sun
opens the
buds and tiny
leaves uncurl,

A conker is the seed of a horse chestnut tree. It grows slowly and a tiny tree shoots up.

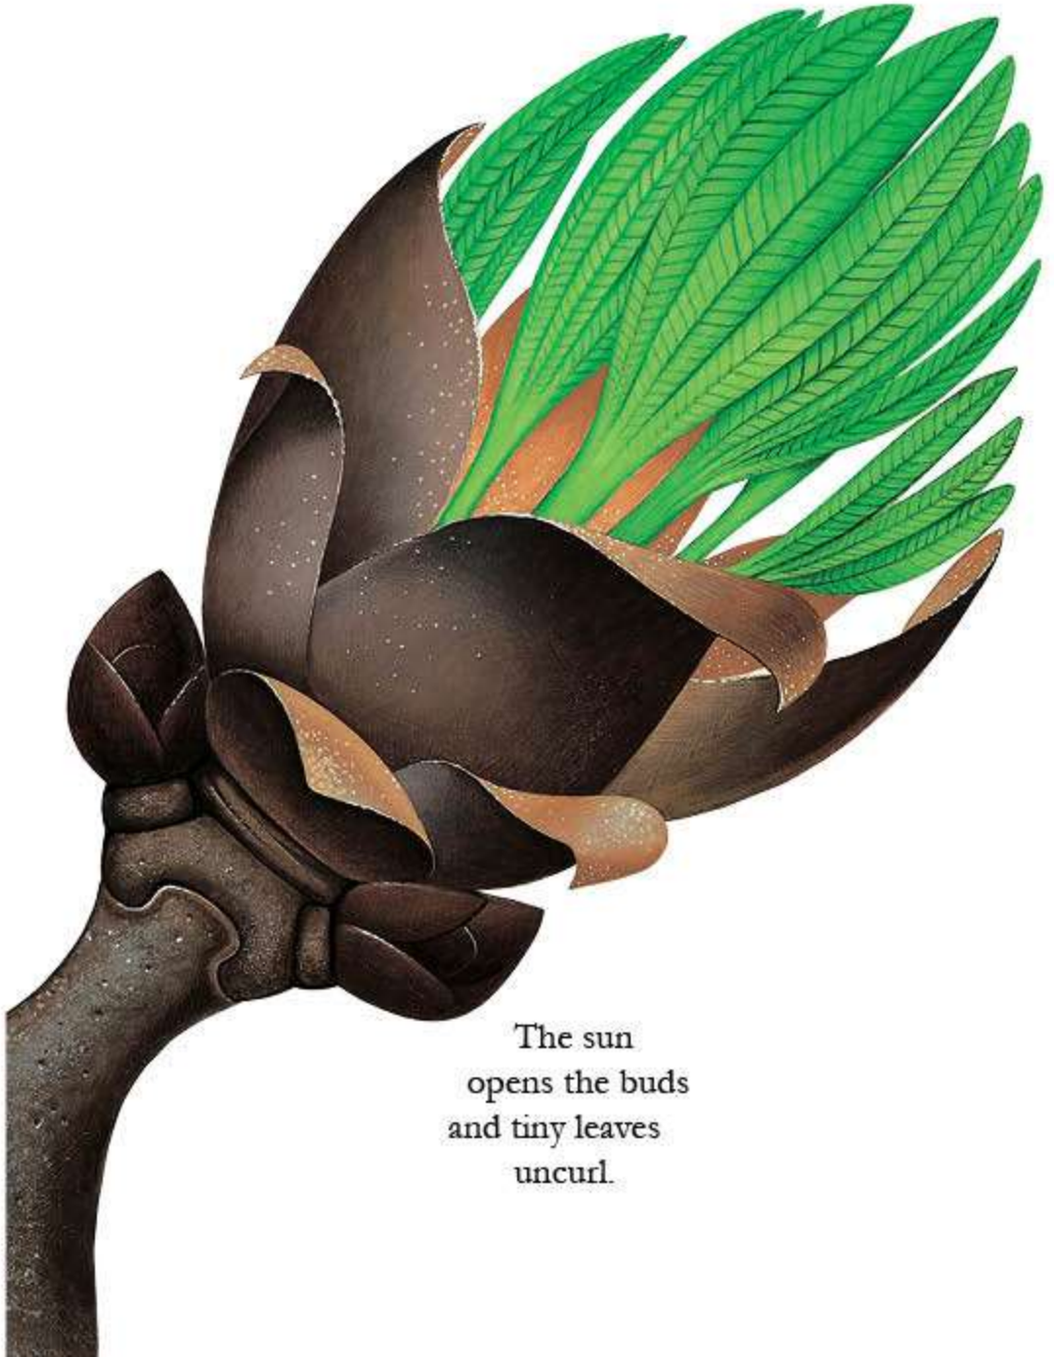

Roots reach down into the ground under the tree to find food and water.

At the end of winter,
buds appear at the end
of every branch.

The chestnut tree loses
all its leaves every year
in autumn.

The sun
opens the buds
and tiny leaves
uncurl.

All trees have
different leaves and fruits.
Learn how to recognize them.

Sweet chestnuts
have long,
thin leaves.

Hazel trees have
heart-shaped leaves.

Oak leaves have
rounded edges.

Walnut leaves
look like a line of
smaller leaves together.

Maple leaves have
five points.

Sweet chestnut

Hazelnuts

Acorn

Walnut

Maple seeds
have wings.
