AMAZING

ANIMALS

SALAMANDER SUPERPOWERS

Salamanders have the ability to regrow limbs, including their tails, in just a few weeks. This helps them to survive attacks from predators.

DARING DASHES

These adventurous animals all escaped into the unknown – but returned happily home afterwards.

Cheeky parrot's wild weekend

A pet parrot that flew off for a wild weekend in Glasgow, Scotland, was found at a local hospital and reunited with his owner.

Eight-year-old Jobby had taken trips to the park with his owner, Apsi Witana, but had "never flown away before," she said. People stuck up posters and put appeals on social media.

The afternoon after he went missing, a nurse phoned to report that Jobby was "eating crisps and playing around" in her hospital. Witana said Jobby seemed "in good spirits".

I wasn't lost - I was on holiday!
