Hello, OCEAN!

James Carter

Stephanie Fizer Coleman

post wave

A World of Water

It's the biggest
drop of H_2O
on any planet
that we know.

But not just big
it's green, it's blue
it's oh-so-deep
it's salty too.

Water Cycle

With waves
ever rolling, raging,
heating up,
evaporating.

Clouds
ever rising,
forming.

Rain
ever pelting,
pouring.

Rivers
ever flowing,
growing...

...liquid motion seeking ocean.

Hello, Ocean

It's nature's
watery nursery –

a world of
rich diversity.

Its depths, its life
its rocky shores –
so much for us
to now…

…explore!

Coast

This meeting place
is planet-wide
where ocean brushes
beach and sky.

Where waves come
crashing on the land
eroding cliffs

and rocks

to
sand.

So now pretend that you are there...

go dip your toes and breathe the air!
