Please print off and read at your leisure.

We must start looking
after our planet.

We are burning
too much oil,
coal and gas.

This makes our
world hotter and hotter.
This is called the
Greenhouse Effect.

We are
using many
more cars
and trucks
that pollute
our world.

We are cutting down
the trees that help cool
our planet. Trees turn
polluting carbon dioxide
into healthy oxygen.

We are filling our
world with rubbish.

We are over-fishing our rivers
and oceans and using chemicals
that poison our marine life.

We can help save our planet by making changes in our own homes . . .

. . . and in our gardens too.
