THE 10 BEST GAMES OF ALL TIME

A great game can last forever! Just getting out a board or looking at the eight pieces can bring back memories of happy times with your family or friends.

This book brings together ten classic games. Some of them, like Ludo or Snakes and Ladders, are games that you might know already. Others, like Stratego or the Royal Game of Ur, might be brand new to you. But all of them are fun to learn and play!

On every double page you'll find all these things:

- a fact file that explains the country or region that the game comes from, how old the game is and the number of players how long a game will last and a list of the pieces you need to play
- how to play the game
- tips and tricks to help you get the most out of each game
- a double-sided game board

On the opposite page, you'll find all the playing pieces and a die that you can use together. Find a friend to play with and let the games begin!
