LESSONS

Maths

What kind of tree does a maths teacher climb?

Geometry.

'If you had one pound and you asked your father for another, how many pounds would you have?'

'One pound.'

'You don't know your arithmetic.'

'You don't know my father.'

If I had seven oranges in one hand and eight oranges in the other, what would I have?

Big hands.

Why was the maths book unhappy?

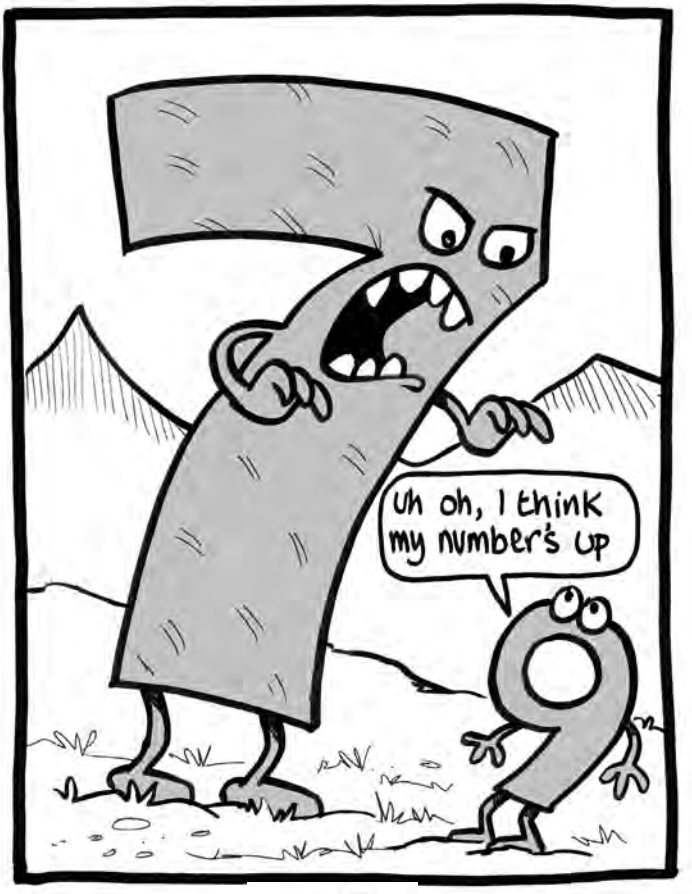

It had too many problems.

Why is six afraid of seven?

Because seven ate nine.

TEACHER: 'How much is half of 8?'
PUPIL: 'Up and down or across?'
TEACHER: 'What do you mean?'
PUPIL: 'Well, up and down makes a 3 or across the middle leaves a 0.'

If there are ten cats in a boat and one jumps out, how many are left?

None; they were all copycats.

TEACHER: 'Now, class, whatever I ask, I want you all to answer at once. How much is six plus four?'
CLASS: 'At once.'
